

Premium Starter with Micros 10-20-22

32% of N from Nutralene[®],
100% of K from SOP
Micro Grade Formulation

- A quality micro starter with iron and magnesium for new seedlings, and excellent for use on sand-based greens and tees, which are typically low in potash and phosphorus.
- Nitrogen derived from Nutralene[®] is released through microbial degradation and hydrolysis, providing consistent release under a variety of environmental conditions.
- Contains magnesium to aid in phosphorus uptake and transport, and iron which will enhance the colour of the turf grass.
- Uniform particle sizing for accurate applications.
