### DIRECTIONS FOR USE:

Apply any time during the growing season when turfgrasses need fertilization. Application may be repeated after 6 weeks as needed.

Apply to dry foliage.

Apply at the **NORMAL RATE** of 0.43 kg N / 100 sq. metres (0.9 lb N / 1,000 sq. ft.). Equivalent to 1.7 kg of product per 100 sq. metres or 3.6 lb of product per 1,000 sq. ft.

During periods with high temperatures of 27° C (80° F) or above, water after application.

Apply at the **HEAVY RATE** of 0.61 kg N / 100 sq. metres (1.25 lb N / 1,000 sq. ft.) in early spring or fall to promote deeper greening and density enhancement. Equivalent to 2.4 kg of product per 100 sq. metres or 5.0 lb of product per 1,000 sq. ft.

Irrigating after application with 1.2 to 2.5 cm (1/2 to 1 inch) of water will hasten initial greening and aid the product penetration into the turf.

Avoid mowing immediately after application to prevent particle pick-up and fracture. Irrigation prior to mowing will reduce particle pick-up.

Do not use on putting greens or other turf areas mowed at less than 1.2 cm (0.5 inches).

Do not use with a drop-type spreader.

Do not expose unused product to moisture.

### STORAGE AND USE:

Store in a clean, dry place. Reseal opened bag by folding top down and securing. Use only clean, dry spreaders. Do not leave unused product in spreaders.

### FIRST AID:

**IF SWALLOWED:** Get medical attention or contact poison control centre.

**IF IN EYES:** Flush with plenty of water and get medical attention or contact poison control centre.

**IF ON SKIN:** Wash with soap and flush with plenty of water.
