DIRECTIONS FOR USE:

Apply any time during the growing season when turfgrasses need fertilization.

Apply to dry foliage.

Apply at the **NORMAL RATE** of 0.43 kg N / 100 sq. metres (0.9 lb N / 1,000 sq. ft.). Equivalent to 1.3 kg of product per 100 sq. metres or 2.7 lb of product per 1,000 sq. ft.

During periods of high temperatures (27° C (80° F) or above), water in immediately after application. Watering after application will hasten initial greening and aid the product's penetration into the turf.

To prevent particle pick-up and fracture by mowing equipment, apply soon after mowing. Watering before mowing again will aid product penetration into the turf.

Do not use on putting greens or other turf areas mowed at less than 1.2 cm (1/2 inch).

Do not use with a drop-type spreader.

Do not use at rates lower than those recommended.

STORAGE AND USE:
